

IN THE CLAIM

Please cancel Claims 1 to 7, without prejudice or disclaimer of the subject matter thereof, and add new claims 8 and 9. The added new claim 8 is based on the original claims 1 to 7 and the features in Figs. 1 and 2 of the present invention and the specification. The claim 9 is from the specification. It is assured that no new matter is added. The relation of the new claims with respect to the original claims are shown in the following REMARK, Examiners can read the claims more easily from the REMARK.

**LIST OF CLAIMS:**

Claims 1 to 7 (cancelled)

Claim 8 (New) A headlight for motor vehicle, comprising:

a base,

a light device provided on said base, and including two light members for generating and providing high beam and low beam respectively, and

means for controlling said light members to selectively generate and provide high beam and low beam respectively;

wherein said light device includes a cover engaged onto said light members to cover and to shield said light members and the cover is a round cylinder and the cover is made of quartz glass material;

wherein said light device includes two tubes coupled to said light members respectively, for light exciting purposes; and a large part of each tube is located out of the cover;

wherein said light device includes two pairs of cables coupled to said light members respectively, for coupling said light members to electric power source respectively;

wherein said controlling means includes a control device coupled to

said light device to control said light members of said light device;

wherein said control device includes at least one stabilizer, one control circuit and one socket; the stabilizer is coupled to said light members of said light device, to stabilize said light members, the control circuit is connected to the stabilizer and the socket is connected to the control circuit; and

wherein said light members of said light device are located at different locations relative to said base of said light device.

Claim 9. (New) The headlight for motor vehicle as claimed in claim 1, wherein the tube is made of material selected from one of china and ceramics.
